

## DISCOVER GREEN POWER

Silicon Valley Green Power was named in 2017 as one of the top 10 utility green power programs in the U.S. – the 11th consecutive year that Silicon Valley Power has achieved the honor for its efforts to allow residential and business customers to voluntarily purchase 100% solar and wind power for their energy use. It is one of several City programs designed to give residents options for preserving and protecting the environment.

Throughout the year, there are informative workshops and special events such as Environmental Day, Earth Day and Household Hazardous Waste Drop-off. New in 2017 was the launch of a pilot residential food scrap recycling program for 5,000 households. Food waste accounts for about 35% of all material thrown away, and this new program will help the City of Santa Clara meet its mandated goal of reducing landfill waste diversion by 75% by 2020.

Something to smile about – Santa Clara Green Power is the lowest cost 100% carbon-free program in the South Bay.
