Master Plan
Study Areas

- Calabazas Creek from Benton Street to the Bay Trail just north of Highway 237
- Hetch Hetchy from Calabazas Creek to the Guadalupe River
- Saratoga Creek from Forbes Avenue to Homeridge Park and from Central Park to Monroe Street
Master Plan Scope of Work

Undertaking:
• Engineering Evaluation
• Stakeholder Coordination
• Public Outreach

Preparing:
A Trail Master Plan that identifies trail alignments and crossing solutions and includes design guidelines and budget estimates.

Evaluating:
The Trail Master Plan under the California Environmental Quality Act (CEQA) to assess impacts.

LEGEND

IN-CHANNEL UNDERPASS FEASIBILITY
- 🟢 ACCOMODATES UNDERPASS
- 🟠 YELLOW ACCOMODATES UNDERPASS
- 🔴 NO POTENTIAL FOR UNDERPASS
- 🔵 NO NEED FOR UNDERPASS
  PARKLAND PEDESTRIAN BRIDGE

LAND AVAILABILITY
- ⬤ ⬤ IDEAL TOP OF BANK (15 TO 25+ FEET)
- ▲ ▲ ▲ ADEQUATE TOP OF BANK (10 TO 15 FEET)
- ▣ ▣ ▣ INADEQUATE TOP OF BANK (<10 FEET)

NOTE
A VEGETATION PRESERVE LINES SARATOGA CREEK FROM THE CONFLUENCE WITH SAN TOMAS AQUINO CREEK TO PRUNERIDGE AVENUE.
Saratoga Creek
Homeridge Park to Forbes Avenue

Pathway through Homeridge Park.

Creekside connection to Forbes Avenue via pedestrian bridge at Stevenson Street.
Saratoga Creek
Cabrillo to El Camino Real

School drop off and pick up at traffic at Cabrillo Middle School.

Fire Road access and pathway adjacent to Saratoga Creek and Cabrillo Middle School.
Opportunities to create a linear park/trail on Hetch Hetchy ROW between the Calabazas Creek Trail and Great America Parkway

Upcoming Patrick Henry Specific Plan.

The LeEco site (former Yahoo! property).
Hetch Hetchy ROW between Great America Parkway and San Tomas Aquino Creek Trail

ROW through Great America/Stadium parking area.

Connection to San Tomas Aquino Creek Trail.
Existing linear park between Lafayette Street and Lick Mill Blvd.

Hetch Hetchy adjacent to Fairway Glen Drive, looking south.

Pathway within Ulistac Natural Area.
Hetch Hetchy connection to Guadalupe River Parkway

Ramp connecting Ulistac Natural Area to Guadalupe River Parkway.

Trail paving would be extended to Thamien Park to link to the River Oaks ped/bike bridge.
Calabazas Creek
Calabazas Creek Land Availability Map
Calabazas Creek - Pomeroy to Benton with Connection to Carmichael Park

Looking upstream (south) opposite Carmichael Park.

Possible ped/bike bridge location (above).

Connection to Benton at Curtis (right).
Potential opportunity for restoration of Calabazas Creek and development of a trail from Pomeroy to Georgetown.
Looking downstream at Monroe toward Agate ped/bike bridge and Caltrain/JPB/UPRR corridor.

Box culvert, Caltrain tracks and spur line tracks all pose engineering challenges.
Possible Pedestrian Overcrossing (POC) to span Lakeside Drive, Highway 101 and Wildwood Avenue (Sunnyvale).
Right of Way (ROW) needed to integrate Calabazas Creek Trail with Mission College Blvd.

Trail descending levee at Mission College Blvd.

ROW is needed along the SCVWD flood wall to extend the trail to the Hwy 101 POC.
Highway 237 connection to San Francisco Bay Trail

Looking upstream (south) from the Bay Trail toward Highway 237.

Existing informal path beneath Highway 237 bridge.
Questions/Comments
