If you would like to submit your own map indicating two Council District Boundaries, there is a way. A map is available online at www.santaclaraca.gov/districtelections which shows City of Santa Clara subareas ("pieces") along with an Excel database of demographic data for each of these pieces. This "Pieces" map can be found under the heading "Maps and Demographic Data" on that webpage. You can use the pieces map and the database to create your recommended districting map. Please print your recommended map or save your Excel file with each Piece allocated to a Council District and email it to the Ad Hoc Advisory Districting Committee at districts@santaclaraca.gov

Draft Plan WE 2

Which draft map indicating two Council Districts do you prefer?

Draft Plan WE 2 (a combination of northern/southern and western/eastern boundaries)

What changes would you make to these draft maps?

For a neutral survey these maps should be shown in a different order each time they are displayed together. In other words, sometimes WE2 should be first, sometimes it should be second and sometimes last - and the same for the other maps. Otherwise - surprise! most people will pick the first one.

Which draft map indicating two Council Districts do you prefer?

Draft Plan NS 1 (northern and southern Council Districts)

What changes would you make to these draft maps?

I would prefer more than two districts. A city this size, I think four or six districts would make more sense. Aside from that, I can't believe the report actually calls out Asian population and a desire to 'equalize' that!! And people wonder why racism exists!? I guess our Council does not look at us as 'Santa Clara' residents....guess we're 'Asian Santa Clarans', 'White Santa Clarans', 'Black Santa Clarans', etc, etc....!?! Looks like our Council wants to categorize our city by race!? Unbelievable!!

Draft Plan WE 2

Which draft map indicating two Council Districts do you prefer?

Draft Plan NS 1 (northern and southern Council Districts)

What changes would you make to these draft maps?

The relative compactness of the two districts would seemingly allow for more localized input and decisions; therefore any changes should be to increase the compactness or increase the 'local-ness' of the districts.

If you would like to submit your own map indicating two Council District Boundaries, there is a way. Draft Plan NS 1

Draft Plan WE 1

Draft Plan WE 2

Which draft map indicating two Council Districts do you prefer?

Draft Plan NS 1 (northern and southern Council Districts)

What changes would you make to these draft maps?

For NS 1, I would change piece 20 to move the little triangle created by Lafayette and the railroad to attach to piece 28; and then I would swap piece 20 to the North district and put piece 22 into the South district.

I think the WE1 plan is a political nonstarter as it would make it very difficult for the northern portion of each district to elect anyone who lives in their part of the city as the political power and wealth is in the southern section of each district.

Draft plan WE 2 is intriguing, but I still prefer NS1 with modification to make sure that more of both districts continues along El Camino Real. As the major commercial thoroughfare and a place where tons of development is happening, it seems in the city's best interest to have all six council members represent as

Which draft Council district map do you prefer?

What Type of Council District Plan do you prefer?

many people whose lives are the most directly affected by decisions along El Camino.

I think that the data summary of the CVAP is not showing what we actually need to know. We don't really need to know how much of the CVAP for each racial category is on which side of the line. We need to know on each side of the line, what percentage of CVAP is in each racial category. Because in order for the districts to be likely to help Asian and Latino voters elect the candidates of their choosing, those groups need to be as close to or more than 25% of the CVAP of each district. Please provide the data analysis that is actually useful to the public.

As it stands, the NS1 map does not put sufficient Asian CVAP into the South district (it is at about 20% for the South district, 40% for the North district). In fact, only the WE1 plan has sufficient Asian population in both districts such that if they voted as a block, which they may or may not obviously, they could elect a council member of their choosing in both districts.

Draft Plan NS 1 (northern and southern Council Districts)

What changes would you make to these draft maps?

Is there any ability to follow El Camino Real the entire length and split the district by that? While it does leave a stretch of land on the edge of the University, I feel like the rough demographics of those living north of the line and south of the line aligns better than adding the stretch of industry northwest of SCU and leaving out the areas between Benton and El Camino Real west of Kiely.
