

Statement of **KEVIN PARK**, Candidate for  
**Member, Santa Clara City Council, Seat 5**

**Occupation:** Scientist, Engineer, Teacher

**Education and Qualifications:**

Living in Santa Clara for nearly twenty years, I have worked to improve Education and Neighborhoods.

Bringing the city back down to Earth shouldn't take a Rocket Scientist, but if it does, I can handle it. I earned my Bachelor of Science degree in Aero/Astronautics from Caltech, and a Master of Science degree from Stanford. I know how valuable education can be and have dedicated much of my life to help students.

With the Santa Clara County Office of Education, I helped build Artspiration for the Arts & Education Council. As a teacher at a local college, I teach classes in programming and creativity.

As a former board member of the Santa Clara Sister Cities Association, I helped connect our city with a larger world community.

As part of Santa Clara's General Plan Steering Committee, I helped create a phased General Plan designed to support livable communities.

As the Chair of the Citizens' Advisory Committee, I have been a strong advocate for community voice. I have worked closely with neighbors on projects such as 900 Kiely, Santa Clara Square, and affordable housing at 2525 El Camino.

More people with more voice.
