

STREETSCAPE & LIGHTING

Utility Constraints & Street Trees

- Electrical lines at back of walk - potential for trees from face of curb approx 3 ft back
- Electrical lines at back of walk & storm drain under gutter potential for trees from face of curb approx 3 ft back, no more than 4 ft deep
- Multiple utility conflicts no trees within curb area

	Trees on sidewalk	
	Trees on sidewalk – no more than 4' deep	
	Utility conflicts – trees must be in street	

Lighting

Existing ECR light pole

Existing ECR light pole with pedestrian light attachment

Potential to add pedestrian-oriented lamps on existing light poles, particularly at activity centers

Do you have any comments on the approach for adding street trees and pedestrian lighting along ECR?
