**Wednesday, August 19**

**7 PM**

So much of the national conversation is focused on how logistically schools will operate, but little has been said on how to help students navigate this exponential level of transition. How to keep track of papers? Manage distractions? Navigate alternating schedules and changing activity options? This webinar will offer strategies on how to help students and families get ready for distance learning, and offers tips on how to track assignments, activities and switching between different learning options.
