Join City staff and your neighbors to learn about and discuss the **Draft Patrick Henry Drive Specific Plan**.

This plan will guide the re-development of a light industrial area in the area north of Highway 101 and Mission College between the Calabazas Creek and Great America Parkway. The Patrick Henry Drive area will become a high-density, transit-oriented residential neighborhood. Built in phases over 20 years, the area will include up to 12,000 residential units, 8 acres of public parkland, plazas and greenways, a new internal roadway system and supportive infrastructure, including extensive pedestrian and bicycle access.

**City of
Santa Clara**
