

# Bag Valve Mask Refresher

## 1hr

**COURSE GOAL:** Refresh and demonstrate competency in using the Bag Valve Mask manual resuscitator. Additionally, demo and issue new CuraPlex Bag Valve Masks (BVMs).

**COURSE OBJECTIVES:**

1. Students will confirm understanding of BVM nomenclature, storage concerns, and resupply procedure by viewing a presentation
2. Students will demonstrate competency in skills related operating the BVM by simulating respirations on a CPR dummy
3. Students will confirm understanding of SCFD interaction with SCPD BVMs

**EXPANDED COURSE OUTLINE:**

1. Demo/Discussion of the BVM, its parts, how to store the BVM and different ways to resupply should you use the BVM in the field
2. Demo/Discuss/Practicals related to operating the BVM in general and best practices for providing respirations aka “rescue breaths” with the BVM
3. Demo/Discussion related to transfer of care from SCPD to SCFD and specifically with the BVM

**Training Venue:**

- This training can be accomplished in briefing trainings and a day or two of bureau conference room trainings

**Training Documentation:**

- Orange cards will be filled out to document the training provided
