Criterias to focus on for adopting a new district map -

Must have-

1. Keep percent deviation below 10% (but not try to minimize) and keep map contiguous & compact
2. Keep communities of interests/concern intact

Nice to Have-

3. Minimize number of people who have to wait for 6 years to vote
4. Attempt to minimize percent deviation in next census by predictingby looking at City Clara Development plan - https://missioncity.maps.arcgis.com/apps/MapTour/index.html?appid=5afdbed13fad458cb6288c46a0bad060#

Data to be provided by the demographers -

1. List of all the maps proposed so far (Maps 1 to 10) with visual representation of neighborhoods, racial/ethnicity data
2. Summary of population changing election districts, years until next election, & Plan deviation

Review criteria for Commissioners -

1. Analyze all the maps provided by the demographers
2. Try to get your questions about submitted maps answered before the next meeting if possible
3. Shortlist 2 maps to discuss and modify in the next meeting
4. List of strong 'No' or 'Must haves' for their districts or the city in general

District 1 development data:

In Pieces 2, 3 and 7 at **least 4473 residential units** are potentially going to come up.

Assuming an average of **1.5 persons in each residential unit**, we are expecting **at least 6708 new residents in District 1**.
