

HYDRANT FLUSHING RESUMES

*Dechlorinated drinking water
discharged into storm drains*

WHY FLUSH WATER LINES?

- ◆ Safeguard water quality
- ◆ Remove sediment & minerals
- ◆ Prevent water stagnation
- ◆ Ensure proper water flow for fire protection

We are committed to conservation and only flush as long as needed to achieve high water quality standards.

Should you notice discoloration or sediment, allow your water to run from an outdoor hose bib until it clears.
